DATA EAST 2021

JUNE 15-16, 2021 EVENT WILL BE HELD VIRTUALLY

**SDSC's Annual Summer Forum on Data Analytics,
Data Policy and Industry Applications**

"Challenges in Building the Data-Intelligent Public Sector"

The terms "data intelligence" and "decision intelligence" are increasingly used to signal the critical next steps in becoming a data-driven organization. Our second annual Data East event will address the key technology, organization, and business model challenges in modernizing and innovating mission-focused public sector organizations. Government has unique challenges in successfully transforming mission, organization, technology and services. Speakers will address these challenges, best practices, and successful transformation strategies in government's role to deliver services now and to be prepared for the future.
